}
```

OUTPUT:

A screenshot of a web browser displaying a form titled "Student Info". The form has three input fields: "Name:", "RollNo: 1", and "Sem:". Below the fields are four buttons: "Select", "Insert", "Update", and "Delete". At the bottom, there is a table with one row containing the text "1 Riya 2".

A screenshot of the "Student Info" form with the "Name" field filled with "Pravin", "RollNo" with "4", and "Sem" with "1". The "Insert" button is highlighted. Below the buttons, a message "data inserted sucessfully" is displayed.

A screenshot of the "Student Info" form with the "Name" field filled with "Ankita", "RollNo" with "4", and "Sem" with "5". The "Update" button is highlighted. Below the buttons, a message "data updated sucessfully" is displayed.

A screenshot of the "Student Info" form with all input fields empty. The "Delete" button is highlighted. Below the buttons, a message "data deleted sucessfully" is displayed.

Practical No: 11

Aim: Design a program for multiple choice quiz application. Store at least 3 questions with their 4 optional answers, the correct answer & marks assigned in sql database table. Calculate total score & display result in Label on click of submit button.(Disconnected Arcitechture)
